

## *Factors Driving Learning Management Systems Initiatives*

### **Race To The Top**

The LEA will use state-level data that is published for use, along with local instructional improvement systems, to improve instruction.

The LEA will use customer-friendly front end systems that are easy for students, teachers, parents, and principals to use and that show growth of students, teachers, schools, and districts disaggregated by subject and demographics

An LEA that has an instructional improvement system will ensure that the system is being fully utilized; an LEA that does not have an instructional improvement system will acquire one.

The LEA will ensure that each school possesses the technology, including hardware, connectivity, and other necessary infrastructure, to provide teachers and students sufficient access to strategic tools for improved classroom instruction and computer-based assessment

### **Strategic Plan**

Brevard Public Schools would like to move towards the 'One Stop Shop' for educational information for teachers, students, administrators, and parents. While continuing to utilize our current applications, identify and research other software packages that will assist in moving Brevard Public schools towards its goal.

### **Florida Legislative Language**

Section 18. Section 1006.281, Florida Statutes, is created to read:

1006.281 Learning management systems.—

(1) To ensure that all school districts have equitable access to digitally rich instructional materials, districts are encouraged to provide access to an electronic learning management system that allows teachers, students, and parents to access, organize, and use electronically available instructional materials and teaching

and learning tools and resources, and that enables teachers to manage, assess, and track student learning.

(2) To the extent fiscally and technologically feasible, a school district's electronic learning management system should allow for a single, authenticated sign-on and include the following functionality:

(a) Vertically searches for, gathers, and organizes specific standards-based instructional materials.

(b) Enables teachers to prepare lessons, individualize student instruction, and use best practices in providing instruction.

(c) Provides communication, including access to up-to-date student performance data, in order to help teachers and parents better serve the needs of students.

(d) Provides access for administrators to ensure quality of instruction within every classroom.

(e) Provides access to multiple content providers.

(3) The Department of Education shall provide assistance as requested by school districts in their deployment of a district electronic learning management system.
